

Datasheet

Smart meter

[Ver. 1.0]

Highlights at a glance:

- Industrial smart meter server for measuring energy consumption directly at the consumer
- Open platform for transfer of measured consumption in kWh per machine
- Easy installation/retrofit in existing systems (e.g. machine controls)
- Design in single-phase and three-phase systems
- Measuring range of 100A or 400A per phase
- Total solution for on-prem operation on the line or in cloud deployment
- 24/7 continuous operation possible
